Li Lu Elevator

The best home elevator that you trust

Established in 1989, Li Lu has been in elevator industry for more than 20 years.

From 1989 to 2000, Li Lu played a role in elevator component manufacture and mainly focused on guide rail production. Li Lu was also a solid supplier in elevator field then.

After the year of 2000, Li Lu has made great effort to its production competence and was able to bring itself to a higher level in terms of elevator manufacture. From providing design, manufacture, sale, installation, and maintenance of elevator, Li Lu currently aims to offer the best service and product to customers.

Li Lu is certified to ISO 9001. The pride of being a professional elevator company and quality assurance has always been our management principle. Not only manufacture "Standard elevators", Li Lu also professionally customizes elevator on the OEM and ODM basis. Li Lu provides customers the most secure, comfortable, convenient, affordable elevator and service.

The commitment to customize safe and comfortable elevators

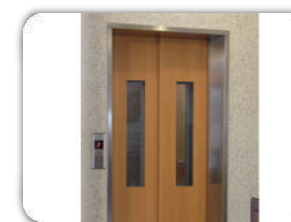

- **Consistent production and service process**

As a Taiwan local brand, Li Lu not only focuses on design, research and manufacture , but also provides customers full service in installation, maintenance, repair and modernization.

- **Customization**

All main parts are made in Taiwan. Besides the standard elevator manufacturing, Li Lu also customizes elevators based on various requests.

- Safety circuit – CE approved
- Visible windows offer you the ability to view your surroundings
- Infrared light curtain is a precise detector to re-open door
- SUS door jamb and sill
- Communication devices built-in for emergency
- LED lighting system for energy saving

Visible Window

Offer you a better view to see inside and outside situation of car. Safety and aesthetic appeal considered.

SUS Sill

Compared with Aluminum sills, SUS sill is more solid and artistic with the only 2 cm-interval makes it safer when riding elevators.

Infrared Elevator Door Detector

To avoid accident from door closing moment.

Built-in communication

Internal panel can memorizes 4 phone numbers, simply press the call button to operate this device.

Door Jamb

Overall made by SUS material. The door jamb embedded in RC wall, and it is durable to against scratch and damage.

LED Lighting System

Energy saving, environment friendly mercury-free and long life LED equipment.

Consistent production and service
